

DISCRETE MATHS SEMINAR INDIVIDUAL REPORT

Deadline: 6pm Friday 21st March 2025

INSTRUCTIONS

- Use the usual Gradescope link to upload your report by the above deadline (the last day of Epiphany term).
- **Please only upload a single pdf file.** You must not upload image files and should first convert your work to a pdf file - your scanning/word processing software will have an option to do this. Please assign all pages to the question when submitting your work to Gradescope.
- Remember your report should be 8-10 pages of A4 paper size, and can be typed or handwritten. This page limit does not include a title page or references page if you include these. You should not attempt to fit more in by making the margin sizes or text size unreasonably small. The markers reserve the right to stop reading if your work goes beyond the page limit.
- **If you did not already include a signed Plagiarism Declaration with your formative one-page practice assignment**, then please attach it to the end of your report.
- See the SEMINAR Folder on ULTRA for detailed information about what is expected in a report and consult with your Seminar Leader if you have any questions.
